SUMMARY

Passionate and Self Learned Java developer with strong foundational knowledge in Java programming and object-oriented principles. Proficient in developing and debugging Java applications, with hands-on experience through academic projects. Quick learner, team player, and committed to continuously improving skills and contributing effectively to development teams.

EDUCATION

Panimalar Institute of Technology

B.Tech Computer Science & Business Systems

2021 – 2025

CGPA – 8.3

SKILLS

- DSA
- Java
- springBoot
- SQL & NoSQL
- HTML
- CSS

TOOLS

- IntelliJ IDEA
- VS Code
- Post Man
- git & github

CERTIFICATIONS

- **UDEMY** certification on Data Structures and Algorithms – 2024
- **AMIGOS CODE** certification on Relational Database and SQL essentials
- **TCS ION** certification on Cloud Computing
- **POST MAN** API Development

Additional Knowledge

- Linux Basics | IOT | Cloud Computing

INTERNSHIPS

TRIOS TECHNOLOGY

2023 – 1 month

Web Development

- Build Robust Backend applications with technologies like springBoot, mongoDB.

PROJECTS

EMPLOYEE MANAGEMENT SYSTEM

- Developed a robust employee management application using **SpringBoot**, **MySQL**, and **React**. The application handles employee data, including CRUD operations, and features a responsive user interface.

CHESS GAME

- Developed a chess game using Java and Swing, enhancing my understanding of **object-oriented programming** (OOP) concepts and improving my **problem-solving** skills.
- This project involved designing the game architecture, implementing game logic showcasing my ability to manage complexity and deliver functional software.

MOVIE REVIEW APP

- Developed a movie review application using **Spring Boot** and **MongoDB Atlas** for the backend, and **React JS** for the front end. Implemented CRUD operations and data persistence with **Spring Data JPA**.
- The application allows users to post, view, and rate movie reviews, showcasing proficiency in full-stack development and modern web technologies.
